WORK WITH THE LEADER IN ICS CYBERSECURITY

The Industroyer and Triton attacks in 2017 clearly signal that industrial control hacks are real and growing in sophistication. For critical infrastructure, ICS cybersecurity in no longer an option. Nozomi Networks is leading the charge with proven technologies that leverage artificial intelligence and machine learning. Our solution continuously monitors operational technology (OT) for cyber threats and process anomalies, providing real-time protection for critical infrastructure and ensuring industrial reliability.

FireEye   FORTINET   CGI   leidos   STARLiNK TRUSTED SECURITY ADVISOR

PROVEN 3RD GENERATION SOLUTION

- First AI-powered ICS anomaly detection
- Industry's only hybrid threat detection (behavior + signature)
- Easy and effective deployments and integrations
- Flexible and responsive ICS experts
- First ICS cybersecurity platform for MSSPs
- ISO 9001: 2015 Certified

WHAT PEOPLE ARE SAYING

enel
"With SCADAguardian we can detect and collect operational and cybersecurity issues in real time, and take corrective actions before threats can strike."

Gian Luigi Pugni
Head of Cybersecurity Design

VERMONT ELECTRIC CO-OP
"Vermont Electric Cooperative enjoys a greatly enhanced security posture that reduces our exposure, so much so that with SCADAguardian in place, I have the peace of mind that lets me sleep at night."

Kris Smith
Manager of Operations Engineering

FireEye
"After extensive review, we chose Nozomi Networks because their platform provides industry-leading capabilities which allow us to detect anomalies and proactively hunt for threats within industrial environments."

Grady Summers
CTO

luxresearch
"Nozomi has impressive traction for a young company, with several large industrial enterprises operating at-scale commercial deployments – industrial clients should engage to secure their increasingly connected enterprises."

Mike Rolfs
Lux Research

About Nozomi Networks

Nozomi Networks is leading Industrial Control System (ICS) cybersecurity with the most comprehensive platform to deliver real-time cybersecurity and operational visibility. Since 2013 the company has innovated the use of machine learning and artificial intelligence to secure critical infrastructure operations. Deployed across five continents, in hundreds of the world's largest industrial installations, customers benefit from advanced cybersecurity, improved operational reliability and easy IT/OT integration. Amid escalating threats targeting ICS, Nozomi Networks delivers one solution with real-time ICS monitoring, hybrid threat detection, industrial network visualization, asset inventory, and vulnerability assessment. Nozomi Networks is headquartered in San Francisco, California. Visit www.nozominetworks.com.
