

Elite Cyber Defenders

Incident Response Program

Nozomi Networks' industry-leading OT/IoT security platform combined with the expertise of the world's top incident response organizations.

Achieving cyber resilience in the modern era of advanced, sophisticated attacks requires coordinated collaboration across an organization's ecosystem of cybersecurity consultants, partners and cyber defense technologies. Well-funded cyber adversaries are becoming more organized with an intent to cause more damage – especially in high-value critical infrastructure. Due to the increasing shortage in skilled cybersecurity resources, it has never been more imperative for organizations to proactively plan for the potential of a breach. Today's cyber environment demands a new approach.

Nozomi Networks has established the Elite Cyber Defenders Program to provide our customers access to the world's top incident response organizations with expert trained IR professionals across OT, IoT and IT, while leveraging the power of the Nozomi Networks technology platform. A program designed around industry collaboration and focused on providing the best security outcomes for our customers.

Government organizations and critical infrastructure worldwide rely on Nozomi Networks and Mandiant for cybersecurity. Our partnership strengthens cyber defenses without compromise at a time when operational resilience has never been more important.

Marshall Heilman, Global Chief Technology Officer, Mandiant

Program benefits

Highly skilled IR professionals trained & certified in Nozomi Networks technologies

Specialization in cyber-physical processes coupled with broad OT, IoT & IT IR knowledge

Close the cybersecurity skills gap with on-demand cyber defense resources

Threat intelligence and security research collaboration focused on novel threats and new TTPs

Minimize incident downtime and reduce business impact

Why Elite Cyber Defenders?

Elite Cyber Defenders have IR resources available globally to engage during an active breach crisis or proactively scheduled to deliver assessment services to help identify potential threats, attack vectors, or other vulnerabilities before a breach occurs.

Elite Cyber Defenders work closely with Nozomi Networks in developing sophisticated incident response and proactive assessment programs to give organizations the strongest

footing to prepare, plan, and respond to breaches across OT, IoT and IT infrastructure. Additionally, our teams engage in unique threat intelligence sharing agreements and security research collaboration to ensure our customers are protected from even the most novel cyber threats.

Nozomi Networks customers now have access to Elite Cyber Defenders – a program designed to deliver the best security outcomes for our customers around the globe.
