Nozomi Networks Guardian™ unlocks visibility across OT, IoT, and IT for accelerated security and digital transformation.

Guardian reduces OT risks for the largest critical infrastructure, energy, manufacturing, mining, transportation, building automation and other OT sites around the world.

**See**
What’s on your network and how it’s behaving

**Detect**
Cyber threats, risks and anomalies for faster response

**Unify**
Security, visibility and monitoring across all your assets
Identify
Asset Discovery and Network Visualization

**Automatically Track Your OT and IoT Assets**

**Up-to-Date Asset Inventory**
Enhances cyber resiliency and saves time with automated asset inventory
Identifies all communicating devices
Provides extensive node information including name, type, serial number, firmware version and components
Presents risk information including security and reliability alerts, missing patches and vulnerabilities

**ADD-ON Smart Polling**
Expands Guardian’s built-in passive asset discovery with low-volume active polling, see: nozominetworks.com/smart-polling

**SUBSCRIPTION Asset Intelligence**
Accelerates the asset learning process and keeps asset profiles and behavior data up-to-date, see: nozominetworks.com/asset-intelligence

**Immediately Visualize Your Networks**

**Reduced Risk Through Network Visualization**
Provides instant awareness of your OT/IoT network and its activity patterns
Presents key data such as traffic throughput, TCP connections, and protocols
Improves your understanding of ‘normal’ operations

**Intuitive Dashboards and Reports**
Explore macro views as well as detailed information on endpoints and connections
Filter by subnets, type, role, zone and topologies
Group assets visually, in lists and detailed single asset views

**Single Asset View** with extensive information.

**Portion of interactive Network Visualization Graph.**
Assess

Vulnerability Assessment and Risk Monitoring

Rapidly Identify Your Vulnerability Risks

Automated Vulnerability Assessment
Identifies which vendors' devices are vulnerable

Utilizes the U.S. government's National Vulnerability Database (NVD) for standardized naming, description and scoring

Efficient Prioritization and Remediation
Speeds response with vulnerability dashboards, drilldowns and reports

Answers questions like:

- "Are my ABC devices running vulnerable firmware?"
- "Are assets from Vendor X vulnerable?"

Continuously Monitor Your Network and Automation Systems

Comprehensive Cybersecurity and Reliability Monitoring
Monitors assets from all vendors and network communications

Displays summarized data related to alerts, incidents, vulnerabilities, compliance, etc.

Highlights indicators of reliability issues, such as unusual process values

Easy Access to OT Data
Summarizes OT and IoT risk information for customizable date and time ranges

Supports drilldown on visual indicators for more detailed information

Queries any aspect of your network or control system performance, reducing data collection and spreadsheet work

Efficient Prioritization and Remediation

Portion of customizable Guardian Dashboard.
Detect
Advanced Anomaly and Threat Detection

Quickly Detect and Disrupt Threats and Anomalous Behavior

Up-to-the-Minute Threat Detection
Identifies cybersecurity and process reliability threats
Detects early stage and late stage advanced threats and cyber risks
Blocks attacks when integrated with compatible firewalls and endpoint security products

Superior OT and IoT Threat Detection
Combines behavior-based anomaly detection with signature-based threat detection for comprehensive risk monitoring
Provides detailed threat information as Yara rules, packet rules, STIX indicators, threat definitions, a threat knowledgebase and vulnerability signatures

Effectively Monitor Mixed Environments

SUBSCRIPTION Threat Intelligence
Ensures up-to-date threat detection and vulnerability identification using indicators created and curated by Nozomi Networks Labs
Delivers ongoing OT, IoT and IT threat and vulnerability intelligence

SUBSCRIPTION Asset Intelligence
Powers breakthrough anomaly detection for OT and IoT that filters out alerts for benign behavior, accelerating incident response
Delivers ongoing OT and IoT asset profile and behavior data

Breakthrough Anomaly Detection for OT and IoT

Rapid Identification of Assets
- Ensures Precise Asset Inventory

Accurate Anomaly Alerts
- Accelerates Incident Response

Asset Intelligence for Dynamic Networks
- Sustains Accurate Inventory & Detection
Dashboards and Reports Highlight Risks

Focuses attention on key concerns by summarizing risks and threats.

Answers vital questions like:
- “What IoT assets do we have?”
- “What are they doing?”
- “What risks do they pose to my organization?”

Detailed Alerts Provide Key Information

Generates detailed, accurate alerts.

Identifies security and reliability risks.

Groups alerts into incidents, providing security and operations staff with a simple, clear, consolidated view of what's happening on their network.

Accelerated Incident Response

Combines Guardian’s breakthrough anomaly detection for OT and IoT with the Asset Intelligence™ service for focused, actionable alerts.

Understands normal behavior for devices with frequent behavior changes, eliminating alerts for benign anomalies.

Improves response time and productivity with precise alerts that are easy to prioritize.

Fast Forensic Analysis

Focuses effort with Smart Incidents™ that:
- Correlate and consolidate alerts
- Provide operational and security context
- Supply automatic packet captures

Decodes incidents with Time Machine™ before and after system snapshots.

Provides answers fast with a powerful ad hoc query tool.
Exceptional Local & Global Performance
Processes data for up to 500,000 assets in real-time
Generates network visualizations, dashboards and reports quickly
Speeds up threat detection and response with local processing of threat and asset intelligence
Deploys quickly at multiple sites

Integrated Security Infrastructure
Streamlines security processes across IT/OT
Makes it easy to harmonize security data for cohesive response
Includes built-in integrations for asset, ticket and identity management systems, as well as SIEMs

Built-in integrations make it easy to streamline security processes.

Consolidated Monitoring of All Facilities
Aggregates data from multiple sites when used with the Central Management Console™
Enables centralized security risk management for all sites
Provides visibility into all OT/ IoT environments

Broad Protocol Support
Supports hundreds of OT, IoT and IT protocols
Utilizes Nozomi Networks’ deep expertise in OT protocols for accurate analysis
Includes Protocol SDK and on-demand engineering services for new protocol support

Easily Integrate with SOC/IT Environments

Built-in integrations make it easy to streamline security processes.
Enhance Guardian for Expanded Visibility and Threat Detection

**GUARDIAN ADD-ON**

**Smart Polling**

- Adds low-volume active polling to Guardian's passive asset discovery
- Identifies non-communicating assets and rogue devices
- Delivers accurate vulnerability assessment for fast and efficient response

Complete details available at: nozominetworks.com/smart-polling

**GUARDIAN ADD-ON**

**Remote Collectors**

- Supplement Guardian data via low-resource appliances for distant and distributed locations
- Collect data and send it to Guardian for further analysis
- Reduce deployment costs for wilderness, off-shore or desert locations

Complete details available at: nozominetworks.com/techspecs

**SUBSCRIPTION**

**Threat Intelligence**

- Reduces risks by shrinking the mean-time-to-detection (MTTD), minimizing impacts
- Delivers ongoing OT and IoT threat and vulnerability intelligence for rapid risk detection
- Consists of rules, signatures and vulnerability updates created and curated by Nozomi Networks Labs, a team of expert security researchers

Complete details available at: nozominetworks.com/threat-intelligence

**SUBSCRIPTION**

**Asset Intelligence**

- Reduces risks by eliminating anomaly alert overload and focusing your attention on critical incidents, decreasing the mean-time-to-respond (MTTR)
- Delivers ongoing OT and IoT asset intelligence for rapid asset identification and precise anomaly detection
- Updates Guardian's anomaly detection technology with device profiles and behavior data based on analysis of millions of devices in use at sites around the world

Complete details available at: nozominetworks.com/asset-intelligence
Flexible Deployment and Licensing

Industrial Strength OT and IoT Security and Visibility

You can deploy the Nozomi Networks solution in a wide variety of mixed environments for rapid asset discovery, network visualization and accelerated security.

Multiple Licensing Options

Nozomi Networks offers a range of licensing options to fit your organization’s preferences, including:

- Subscription licenses
- Enterprise license agreements (ELAs)
- Perpetual licenses

Please contact your Nozomi Networks Sales Director for more information.
Sample Deployment Architecture

Purdue Model Example

You can tailor the Nozomi Networks solution to meet your needs by utilizing its flexible architecture, extensive range of appliances, and integrations with other systems.

Nozomi Networks partners deeply with the IT/OT services and technology companies you trust. These include:

- **Strategic alliances** with enterprise IT and managed security providers
- **Technology integrations** with leading IT/OT solutions
- **SI/VAR relationships** with 250+ prominent organizations around the world

Visit [nozominetworks.com/partners](https://nozominetworks.com/partners) for more information.
Guardian Appliances
for the Large Enterprise

**NSG-HS Series**
Rack-mounted appliances for real-time OT/IoT visibility, cybersecurity and monitoring
- 300,000 - 500,000 Nodes
- 6 Gbps Max. Throughput

**NSG-H Series**
Rack-mounted appliances for real-time OT/IoT visibility, cybersecurity and monitoring
- 100,000 - 200,000 Nodes
- 3 Gbps Max. Throughput

## Remote Collector

Low-resource appliances that collect asset and network data in remote locations and send it to Guardian for further analysis

- **Max. Throughput**: Up to 15 Mbps
- **Remote Collector Support**: Not available
- **Monitoring Ports**: 2x1000Base-T, 1xSFP
- **Expansion Slots**: Not available
- **Storage**: 8 Gb
- **Form Factor**: DIN mountable
- **Max. Power Consumption**: 12W
- **Power Supply Type**: 12-36V DC
- **Temperature Range**: -40 / +70° C
- **Heat Generation**: 55.44 BTU/hr
- **HxWxL (mm/in)**: 415 x 170 x 138 / 2.71 x 6.67 x 5.00
- **Weight**: 1.2 Kg
- **Compliance**: RoHS
- **Certifications**: CE, FCC, UL

### Virtual Remote Collector

- **Max. Throughput**: 15 Mbps
- **Deployment Options**: Hyper-V 2012+, KVM 1.2+, VMware ESX 5.x+, XEN 4.4+

For complete and current tech specs, visit: [nozominetworks.com/techspecs](http://nozominetworks.com/techspecs), or contact us.
Guardian Appliances

Multiple Deployment and Support Options

Here are several options for deployment and support assistance:

- Nozomi Networks Global Strategic Alliance Partners
- Nozomi Networks SI/VARs
- Nozomi Networks Professional Services
- Nozomi Networks Global Customer Support
**PRODUCT**

**Guardian**
Guardian provides industrial strength OT and IoT security and visibility. It combines asset discovery, network visualization, vulnerability assessment, risk monitoring and threat detection in a single solution. Guardian accelerates security and simplifies IT/OT convergence.

**SUBSCRIPTION**

**Threat Intelligence**
The Threat Intelligence service delivers ongoing OT and IoT threat and vulnerability intelligence. It helps you stay on top of the dynamic threat landscape and reduce your mean-time-to-detection (MTTD).

**GUARDIAN ADD-ON**

**Smart Polling**
Smart Polling adds low-volume active polling to Guardian’s passive asset discovery for enhanced asset tracking, vulnerability assessment and security monitoring.

**PRODUCT**

**Central Management Console**
The Central Management Console (CMC) consolidates OT and IoT risk monitoring and visibility across many distributed sites, at the edge or in the cloud. It integrates with IT security infrastructure for streamlined workflows and faster response to threats and anomalies.

**SUBSCRIPTION**

**Asset Intelligence**
The Asset Intelligence service delivers ongoing OT and IoT asset intelligence for faster and more accurate anomaly detection. It helps you focus efforts and reduce your mean-time-to-response (MTTR).

**GUARDIAN ADD-ON**

**Remote Collectors**
Remote Collectors capture data in remote, distributed locations and send it to Guardian for analysis, improving visibility while reducing deployment costs.
Nozomi Networks

The Leading Solution for OT and IoT Security and Visibility

Nozomi Networks is the leader in OT and IoT security and visibility. We accelerate digital transformation by unifying cybersecurity visibility for the largest critical infrastructure, energy, manufacturing, mining, transportation, building automation and other OT sites around the world. Our innovation and research make it possible to tackle escalating cyber risks through exceptional network visibility, threat detection and operational insight.
