

SOLUTION BRIEF

Mandiant OT Incident Response Services Complement the Nozomi Networks Security Platform

Cyber defense of operational technology (OT) and industrial control systems (ICS) introduces challenging requirements to traditional IT security controls and processes. Protecting critical infrastructure and cyber-physical processes requires an understanding of a wide range of threats, industrial protocols, and devices, as well as appropriate response and remediation efforts that minimize disruption and process downtime.

With increasingly sophisticated and well-funded attacks against mission-critical systems and infrastructure, a full spectrum solution is required to address all phases of every security event lifecycle, against all security threats and device types. Yet most organizations are facing a well-documented security skills gap and resource constraints, and are looking for solutions to automate, manage or guide planning, monitoring and incident response efforts. Technology alone does not fully protect against a determined attack. Developing resources with OT and ICS security knowledge can be a daunting task.

Nozomi Networks and Mandiant cover a comprehensive view of the incident response lifecycle from vulnerability and risk assessments, detection of security threats and anomalies, as well as incident response services, forensic tools, and reports.

Benefits

Combined security technology platform and service offerings

from industry leaders

Integrated focus of OT, ICS

and IT security issues and remediation efforts

Combined threat research and threat intelligence collaboration

Integrated technologies for vulnerability and risk assessments, asset visibility, threat and anomaly detection, guided remediation efforts and forensic tools

Cloud-hosted security platform

for scalability and accelerated deployment

Nozomi Networks and Mandiant: Completing the Picture

Nozomi Networks and Mandiant have expanded their strategic partnership to deliver a more comprehensive combination of platform technology, security services and threat research.

Nozomi Networks brings its OT and ICS security platform that automates vulnerability and risk assessments, threat detection, and reporting, alerts, and forensic tools. Mandiant complements the OT/ICS security technology with an extensive set of security services, including incident response services, managed security services, threat intelligence, security assessments, penetration testing and educational services.

Mandiant has been at the forefront of cybersecurity and cyber threat intelligence since 2004. Mandiant's incident responders have been on the frontlines of the most complex breaches worldwide. These experts have a deep understanding of both existing and emerging threat actors, as well as their rapidly changing tactics, techniques and procedures.

Mandiant combines investigative and remediation expertise gained by responding to thousands of incidents with their

industry-leading threat intelligence. Mandiant's work on the largest and most publicized incidents uniquely qualifies their experts to assist clients with all aspects of an incident response—from technical response to crisis management.

The persistence of modern threat actors requires attention and increased knowledge from all security professionals. With a combination of breach, machine, operational and adversarial intelligence, cultivated by more than 300 experts, across 23 countries and covering 30+ languages, Mandiant provides organizations with up-to-the-minute updated threat intelligence to perform their security tasks faster and with more accuracy.

Nozomi Networks and Mandiant work closely together in developing sophisticated incident response and capability development programs to give organizations the strongest footing to both respond to and prevent breaches across OT and ICS infrastructure. Our teams also closely collaborate in staying ahead of the evolving threat landscape through deep threat intelligence research.

How can a combined security platform and OT/ICS security offerings accelerate your incident response and time to value?

MANDIANT

About Mandiant

Since 2004, Mandiant®, now a part of Google Cloud, has been a trusted partner to security-conscious organizations. Today, industry-leading Mandiant threat intelligence and expertise drive dynamic solutions that help organizations develop more effective programs and instill confidence in their cyber readiness.

Nozomi Networks accelerates digital transformation by protecting the world's critical infrastructure, industrial and government organizations from cyber threats. Our solution delivers exceptional network and asset visibility, threat detection, and insights for OT and IoT environments. Customers rely on us to minimize risk and complexity while maximizing operational resilience.
