

PROFESSIONAL SERVICES

# Optimization Service

Post-deployment services are designed to help you maximize the value of your investment in Nozomi Networks.

## Optimize Your Nozomi Networks Solution

The Optimization Service is designed to support your post-deployment needs and help you get the most out of your investment in Nozomi Networks technology.

That may mean integrating your OT/IoT security solution with other systems or aligning it more closely to business processes. You might want to customize it for deeper operational insight or tune its settings and configurations to match your continuously evolving operational environment.

Our Professional Services Consultants are here to help you through the optimization activities outlined in the Service Catalog, including:

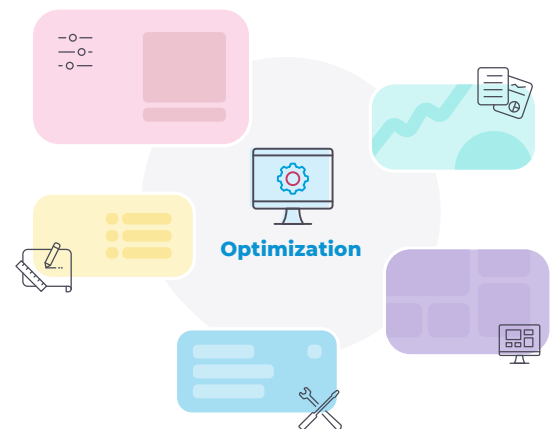

- |   |                            |   |  |
|---|----------------------------|---|--|
|  | Alerts review and tuning   |  | Support for upgrades and new feature updates                     |
|  | Dashboard customization    |  | Integration with external solutions supported by Nozomi Networks |
|  | Report customization       |  | Design review  |
|  | New features configuration |  | Minor changes in your current Nozomi Networks deployment         |

For your convenience, the Optimization Service can be conducted remotely or onsite, and services can be selected on an ad hoc basis as needs evolve.

**Tailored to Your Needs**

**Flexible Planning**

**Highly Experienced Consultants**

# Using Your Optimization Service Bundles

Nozomi Networks Optimization Service is available in bundles of 5 person-days, which can be used within a 12-month period from the date of Service activation.

You can purchase as many bundles as you need, either in advance or throughout the year, and use the days as needs arise through pre-scheduled sessions.

Start subscribing to our Optimization Service by purchasing

one or more bundles. When you're ready to engage Nozomi Networks Professional Services, select one or more activities from the Service Catalog, then check and accept the proposed activity plan, including the required person-days for the engagement.

One of our Consultants will get in touch to schedule delivery of the specified activity, either remotely or onsite.

To subscribe to the Optimization Service, contact your Nozomi Networks sales manager or reseller.

## More Post Deployment Services

**Our Health Check Service** provides insight into the state of your Nozomi Networks solution at a given point in time, outlines security best practices and offers recommendations for improving your deployment. Based on advice from our Professional Services Consultants, you'll be able to proactively optimize your OT/IoT visibility and monitoring system, fully leverage the solution's powerful features, and keep your security posture up-to-date. To learn more, please review the [Nozomi Networks Health Check brochure](#).

Don't see what you need? We can easily adapt our Professional Services engagement to address your specific requirements.

# Nozomi Networks

## The Leading Solution for OT and IoT Security and Visibility

Nozomi Networks accelerates digital transformation by protecting the world's critical infrastructure, industrial and government organizations from cyber threats. Our solution delivers exceptional network and asset visibility, threat detection, and insights for OT and IoT environments. Customers rely on us to minimize risk and complexity while maximizing operational resilience.
